Dear Leonid,

I want to thank you again for your very interesting lecture on the economics of St. Petersburg. The information you provided was important background to our student's study in St. Petersburg. Your presentation was an important part of our 2012 University of Maryland summer school. David Falk, Luis Quiros, Roger Lewis and I greatly appreciate your valuable contribution to our program.

From this side, I am beginning to think about how we might do a joint course with some of our students and some of yours. I will be in touch about this.

Best wishes until next time.

Professor, Ph.D. Director and Associate Dean
